

## Audible is offering a huge selection of Free Audiobooks

In our Reading Resources Document, we mentioned we'd let you know the details on Audible's free books and we're excited to say, they've made it pretty easy!

### Key details

- The collection is available for free through the web address [stories.audible.com](https://stories.audible.com)
- No Login or signup is required
- If you already have an account, you don't listen through this
- You do not listen to these stories through the app, just a web browser.

### Information from Audible on how to access.

Audible Stories can be accessed from virtually anywhere. On your computer, tablet, or smartphone, just navigate to [stories.audible.com](https://stories.audible.com). Make sure you are using the latest version of Chrome, Firefox, Safari, or Edge browsers. No login, no payments, and no strings attached!

### How to continue your story where you left off

If you want to stop a story and come back to listen later, you must use the same device and browser – then you can pick up where you left off. Remember that you can only continue listening to your most recent story. For instance, if you start listening to Title A and then switch to listening to Title B, only your place in Title B will be saved. If you lose your place, you can always use the chapters or the player slider to try to find what you last heard.

Note: Safari on iPad will not play the second title until the page is refreshed. We are working on fixing this, but for now please refresh the page or use Chrome.

### How to entertain multiple listeners at the same time

There is no limit to the number of people who can listen to Audible Stories at the same time. We recommend using different device-browser combinations for each listener, so each listener can stop and continue listening without losing their place.
